

Value of Information Report

23 October, 2014

Introduction

This is a mess. Needs lots of work.

To do - make it work as docx and html!

Tables

more tables

small text

```
colnamesParams <- colnames(params)
print(colnamesParams)
```

NULL

The parameter names are The parameter names are

\begin{footnotesize}

```
#print(environment())
#print(values.imported(environment()))
#print(params)
# print(inb)
#if(values.imported(environment())){
#print(environment())
#library(xtable)
#options(xtable.comment = FALSE)
#options(xtable.booktabs = TRUE)
#EVPI <- cbind(pEVPI)
#colnames(EVPI) <- "Partial\ EVPI"
